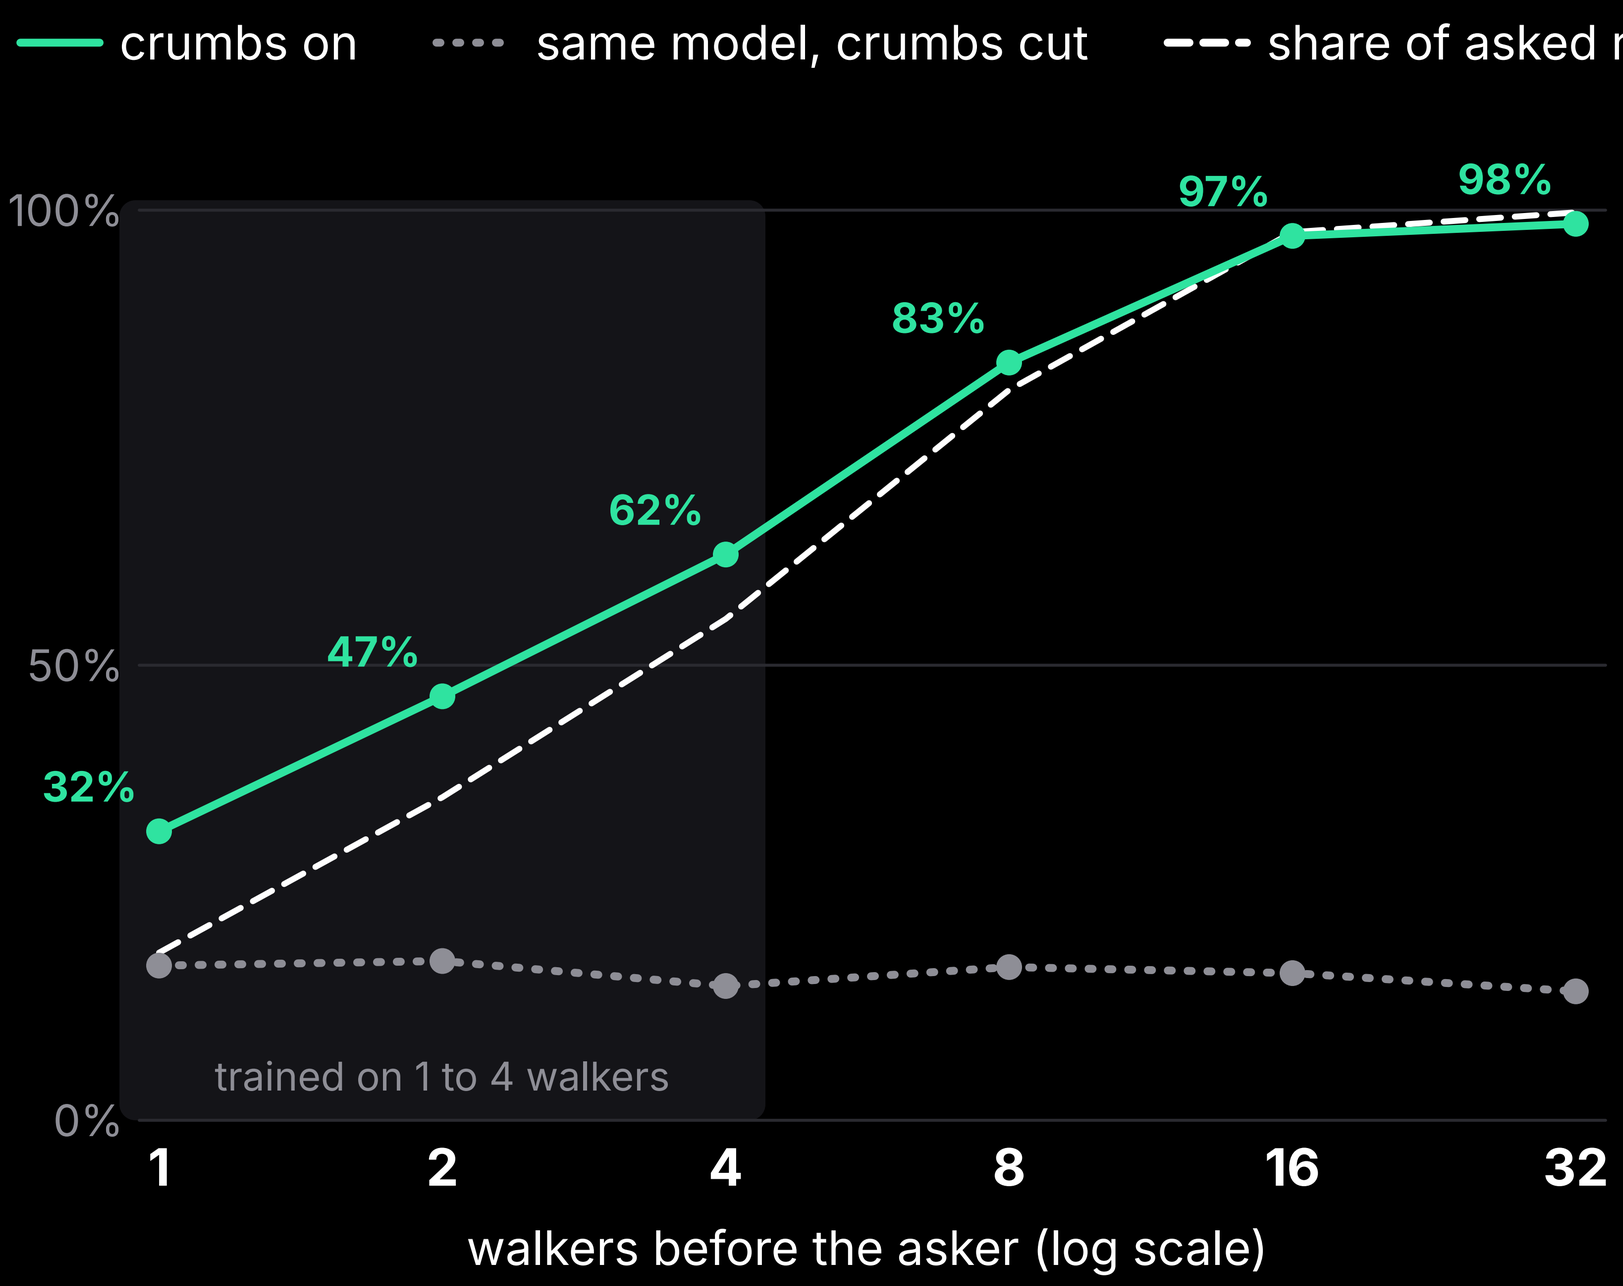
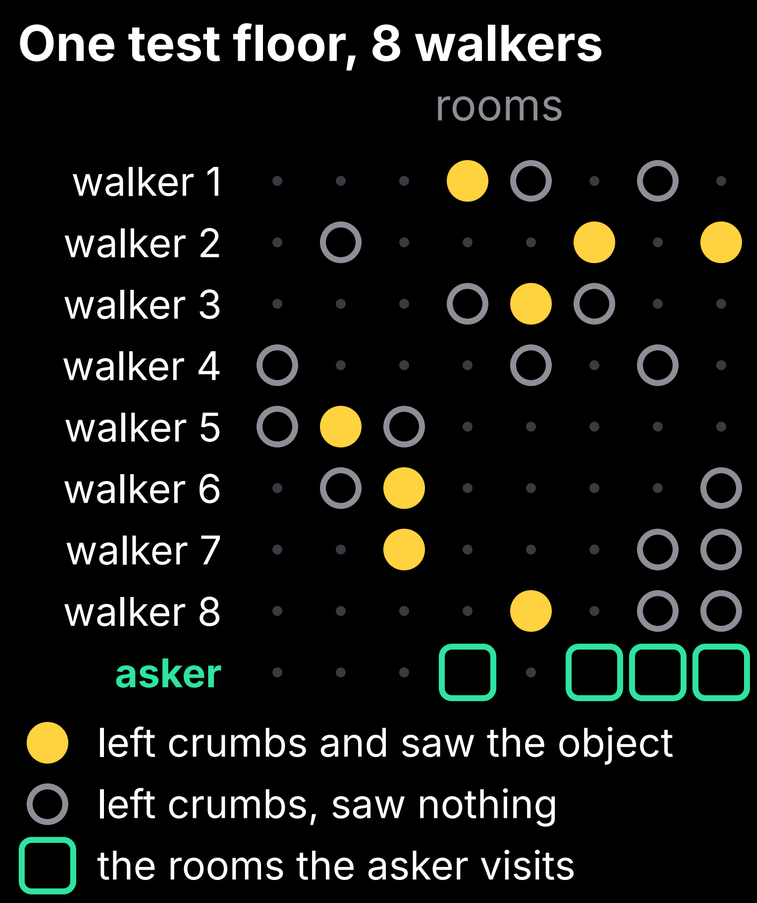
Reading the KV crumbs of up to 32 walkers, the asker picks the right object in 99% to 100% of the rooms that some walker saw





Qwen3-0.6B with 4 KV crumbs per visit, trained on trail and old growth with 1 to 4 walkers from the KV run trained on seven crumb games. Forced choice: each asked room's object against the floor's 7 other objects, 300 test floors per number of walkers. Rooms no walker saw can only be guessed; on rooms some walker saw the asker is right in 99% to 100%.
