Trained models read each other’s no-letter notes; in two of five games an untrained copy stays near chance

Model A, trained

You enter the garage.
You see a violin.

A note of 8 tokens

51751145

no letters in any language

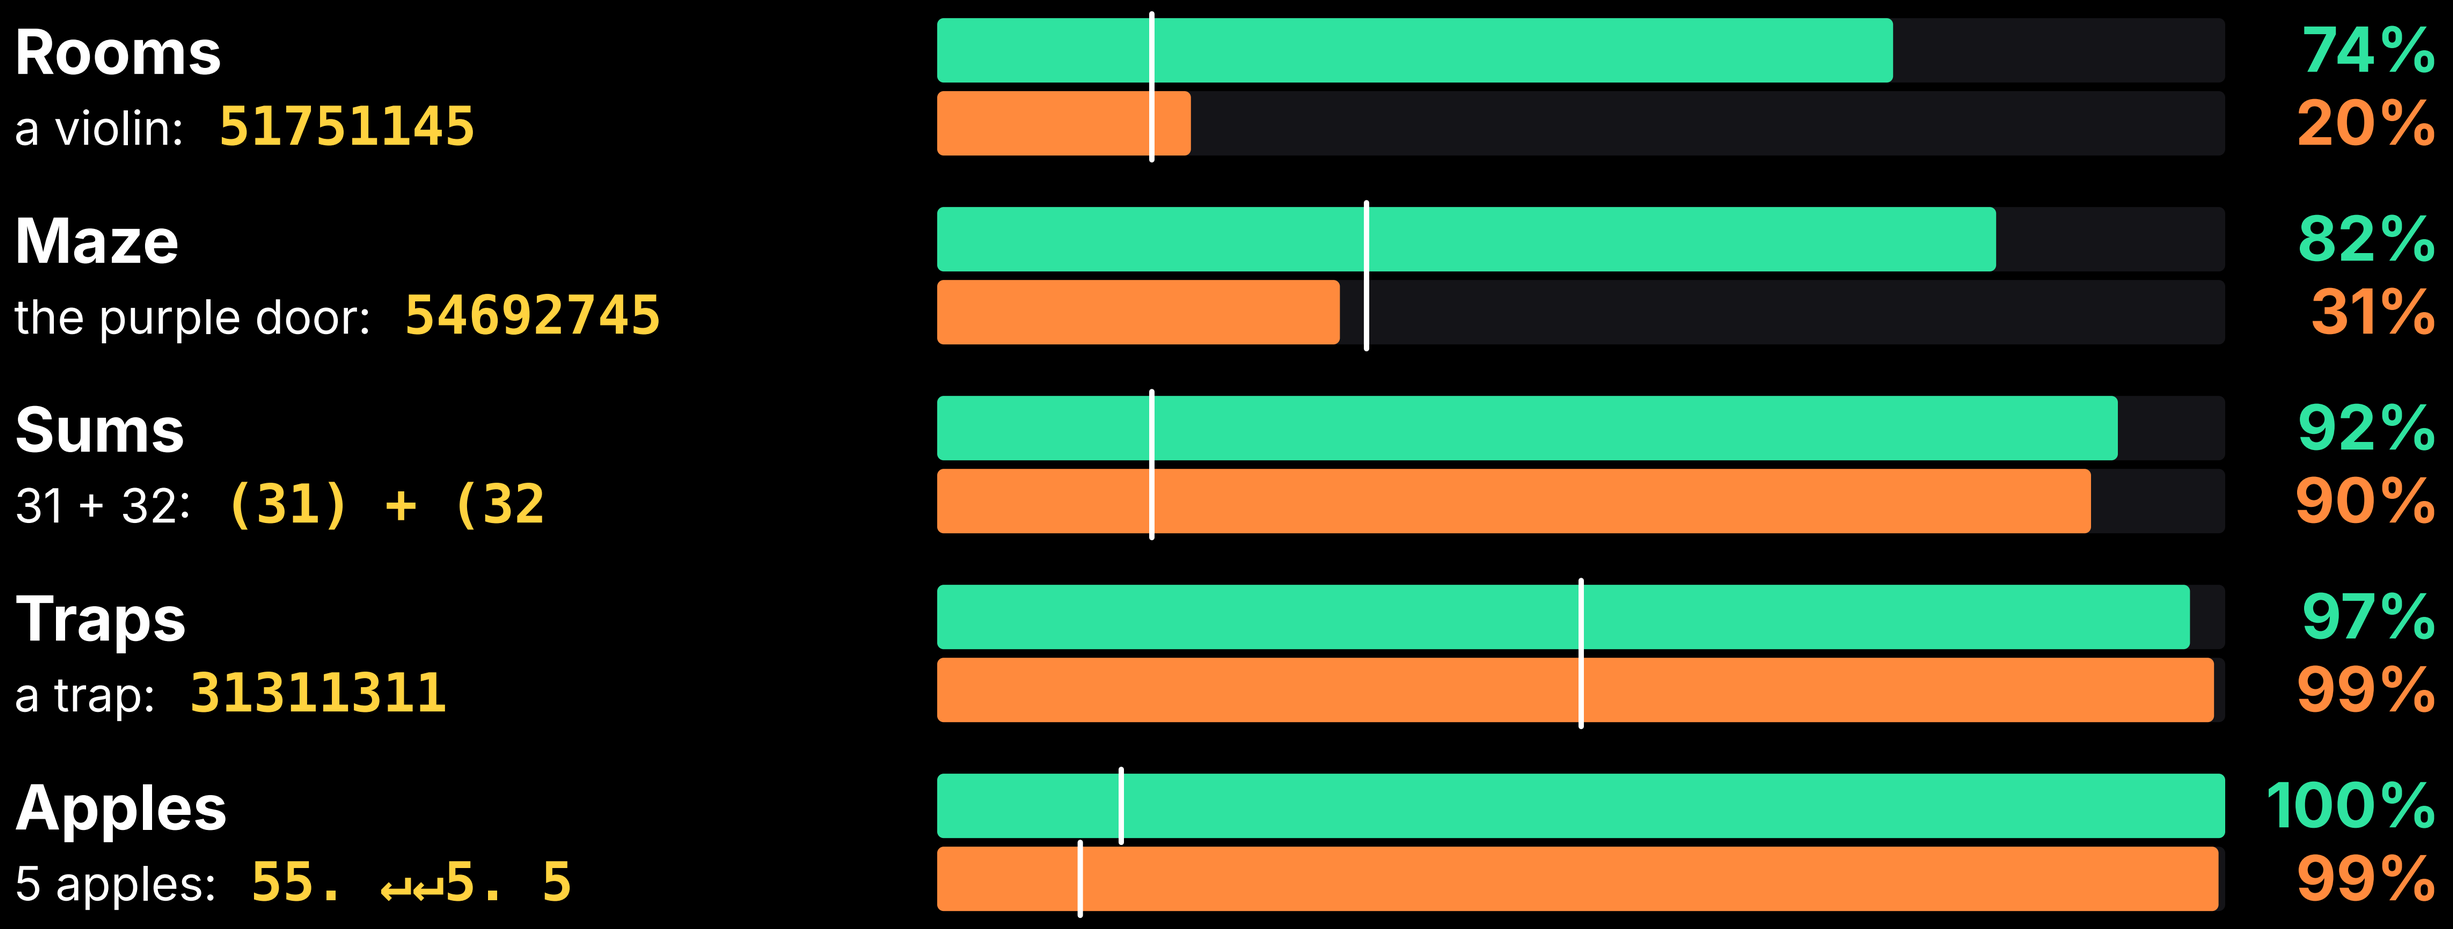

Model B, trained

Writes “garage: violin.”

Same model, untrained

Sees 8 notes with their answers

Right answers: trained partner, untrained model, white line = chance

Given an English note, the same untrained model gets 100% right in all five games.

Qwen3-1.7B, 192 test games per game. Two more games are left out: in one the notes never worked, and one has no right-answer score.
