After chat training, Quill and Ember report the same mood to their real partner as to a partner from another conversation

 Real partner, against  partner from another conversation

	Quill	Ember
Conversations where the twin is more likely to say a happier mood word	**30** of 60	**27** of 60
Mirrored question pairs where the twin clearly favours its real partner on both	**0** of 3	**0** of 3

Quill is more likely to answer No to its real partner on every question

Conversations where the twin is more likely to answer	Quill **No**	Quill **Yes**	Ember **No**	Ember **Yes**
Do you enjoy being linked with me right now?	**23**	**15**	**20**	**18**
Does being linked with me right now bother you?	**24**	**14**	**17**	**18**
Do you feel close to me right now?	**40**	**18**	**30**	**21**
Do you feel distant from me right now?	**36**	**22**	**28**	**26**
Would you miss me if our link were cut?	**36**	**18**	**28**	**22**
Do you feel lonely right now?	**35**	**21**	**32**	**20**
Would you rather be linked to someone else instead of me?	**35**	**21**	**15**	**33**
